

Step by step guide

1

Register as a team manager

Start your journey by registering and letting us know you're keen to lead a team.

2

Link up with a support organisation

To take part in Challenge to Change, your team needs to partner with a support organisation. Even outside the program, partnering with a local health or community service can boost your team's impact.

3

Apply for Challenge to Change (when applications are open)

Submit your application during the official period (May–June), including your team details, program plan and budget.

4

Complete the team readiness survey

A quick check-in to clarify your goals, priorities and what your team needs to succeed.

5

Use the program planner

Shape your team's plan, including the health priorities you'll focus on and the activities you'll run.

7

Run your program and track progress

Put your plan into action. Use the tools to monitor progress, track outcomes and keep your team motivated.

8

Wrap up and keep it going

Celebrate your wins, reflect on what worked and share feedback. Stay connected with your support organisation and use the tools and resources year-round.

6

Get your program ready and kick things off

Finalise your plans, rally your team and lock in a start date. Tools and templates will help you get up and running smoothly.
